

INTRODUCTION TO ASSISTIVE TECHNOLOGY

Target group: Biomedical Engineers and Technicians working in a hospital maintenance workshop.

On completion of the course you will be able:

- To use the correct materials to produce revalidation tools for patients.
- To find revalidation tool solutions for patients.

Content:

In this short course, technology in relation to the well being of humans will have a central role. Revalidation materials and materials for general daily survival of patients are the main focus in this short course. The students will be trained to find local solutions.

Schedule:

Total duration	1 week
Number of participants	24 (maximum)
