

Willem van Prooijen

Nationality: Dutch

After four years working in Wageningen as a Senior Radiographer/ Ultrasonographer Willem began his association with Fontys University of Applied Science in Eindhoven in 1990 where he joined the School for Medical Imaging and Radiotherapy Techniques (MBRT). It was here that he began his teaching career in ultrasound as well as being responsible for curriculum development (Problem Based Learning) and the execution of national and international ultrasound study programs. He was also an active member of the management team of the MBRT.

Since 2001 Willem has actively been involved, on a full time basis, in international projects and has developed expertise in accounts management, survey leadership and management of complex projects and programs in developing countries. He has continued to widen his experience in the medical education field in developing countries with Nursing, Medical Imaging, Hospital Management, Maintenance Management, Hospital Waste Management and Policymaking whilst exploring and maintaining a network in industry, None Governmental Organisations (NGO's) and governments.

Willem's most recent educational achievement was to complete his Masters Degree in Public Management in 2006 at TIAS Business School in Tilburg. As part of his final thesis Willem gave advice to the Fontys Board of Management concerning a new organization model to establish innovation and entrepreneurship in the organization.

Willem is very proud that Fontys International Health Projects became an independent company in May 2009 and is now known as:

MeduProf-S B.V.

'Sustainable Medical Education for Professionals'

By becoming independent MeduProf-S is in a position to serve our clients better whilst maintaining the close partnership with Fontys University of Applied Sciences with Willem as the Managing Director.
