

## **Wilma de Groot**

Nationality: Dutch

Wilma started her career as a Diagnostic Radiographer but soon realised that her passion was Ultrasound. She practiced sonography for 10 years in a clinical environment at the Martini Hospital in Groningen.

Thereafter, Wilma worked at the Hanze University in Groningen from 1996-2007 before joining Fontys International Health Projects / MeduProf-S in September 2007. Prior to this, from January 2000 she worked as a freelance consultant conducting courses in Ultrasound and developing curricula for advanced Ultrasound and Medical Imaging courses.

Wilma has over 10 years experience in international education and training with her main focus of work being institutional capacity building, operational management of the teaching component of large Hospital Rehabilitation Projects and skills development combined with in-depth training in Ultrasound.

Wilma's international experience has been built over a wide range of institutional contexts in several emerging countries. She has extensive experience in Ghana, Tanzania, Zambia, Egypt and Uganda.

Wilma holds a diploma in Radiography, a degree in Ultrasound and a degree in Education. She is currently studying for her Master's degree in International Health (MIH) at KIT/VU in Amsterdam.
