

RADIOLOGY

CARDIAC MRI

Target group: Radiologists

On completion of the course you will be able to:

- Understand the concepts of cardiac MRI
- Recognise the anatomy of the heart
- Understand the different techniques used in cardiac MRI Imaging

Content:

- Cardiac MRI technique
- Physics relevant to cardiac MRI
- Cardiac MRI anatomy
- Clinical applications
- Imaging in cardiac ischemia (perfusion, stress and viability imaging)
- Delayed enhancement imaging
- Velocity mapping

Schedule:

- Course duration 1 week
- Number of participants 24 (maximum)
