

RADIOLOGY

QUALITY ENHANCEMENT IN CT IMAGING

Target group: Residents in Radiology, Radiologists

On completion of the course you will be able to:

- Understand the principles related to CT
- Use accurate scanning protocols
- Choose an accurate injection rate of contrast media and scanning delay
- Recognise image artefacts
- Give an indication of radiation dose
- Recognise cross sectional anatomy

Content:

- Principles related to CT
- Image formation
- Scanning protocols
- Contrast media
- Image artefacts
- Radiation safety
- Cross-sectional anatomy

Schedule:

Course duration	1 week
Number of participants	24 (maximum)
